

## Polyethylene Wax 353

Properties	Result
Form	Bead
Color	White
Density (g/cm <sup>3</sup> )	0.91±0.03
Melting Point °C	110±10
Viscosity @ 140 °C (cP)	<100
Moisture (%)	Max 1.0
Penetration (dmm)	Max 2.0
Solubility in Water	Insoluble

### Application

Highly effective external lubricant for PVC Processes (such as calendaring, extrusion, injection molding, casting and etc.)

PE and PP base masterbatch

Asphalt, Printing ink, varnish and polishing industries, hot melt adhesives, paraffin compounds, candle making

### Packing

25 kg net, in multifold polypropylene bag.
